

Patent Intelligence, from idea to enforcement.

Secure, Reliable, Integrated,
Collaborative

www.deepip.ai

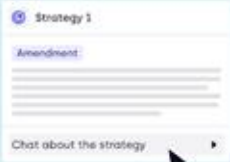

The AI Patent Platform for IP Practitioners

Patent drafting

DeepIP's drafting tool accelerates patent preparation by guiding you through claim construction, description drafting, and consistency checks, ensuring clarity and compliance throughout the application.

[+ Create matter](#)

Office actions

DeepIP's prosecution tool centralizes office actions and responses, automatically highlighting examiner objections and helping you draft clear, structured OARs to streamline patent prosecution.

[+ Create matter](#)

Patentability

DeepIP patentability tool helps you analyze and formalize inventor materials, identify gaps, and generate follow-up actions—guiding you through the entire invention disclosure process.

[+ Create matter](#)

Patent review (Word Addin)

DeepIP patent review offers automated rejection risk assessment, claim checks, and specification reviews — helping ensure stronger filings and reduce prosecution risk.

[Available in Word](#)

Freedom to operate

DeepIP freedom to operate helps you identify, understand, and avoid patent risks before launching your product.

[+ Create matter](#)

Invalidity

DeepIP invalidity helps you challenge competitor patents by finding strong prior art to weaken or invalidate their claims.

[+ Create matter](#)

Beta Agentic search

DeepIP search tool provides agentic, end-to-end IP analysis for patentability, invalidity, FTO, and EOU — automating prior art searches and delivering clear, actionable insights for faster, more confident decisions.

[Open beta](#)

Beta Portfolio intelligence

DeepIP portfolio intelligence delivers smart, automated analysis of patent portfolios — revealing strengths, weaknesses, and opportunities to guide strategy and maximize IP value.

Augmenting Every Step of the Patent Lifecycle

● Preparation & Prosecution

Drafting + Review + Office Action + Continuation

Draft faster & Better

Automate application review

Prosecute Faster

Suggest Continuations

Kickstart drafting fast, free time for claims work, and deliver stronger final filings.

ROI drivers:

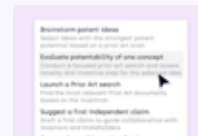

- Faster drafting & prosecution
- Higher-quality work product
- More continuations

● Opinion Work

FTO/ Invalidity / Patentability

Systematic risk assessment and design around

Systematic patentability search

Faster turnaround time for vulnerabilities assessment

Speed up risk reviews, strengthen opinions, and cut grunt work.

ROI drivers:

- Lower search costs
- Shorter matters
- Better client advice

What Makes DeepIP Unique

Secure & Confidential

Enterprise-grade security Soc2 II, ISO 27011, governance, and confidentiality at every step.

Simple

Delivering measurable productivity gains **from day one**.

AI integrated in the Workflow

Embedded in your daily tools — Word, IPMS, and Web — delivering **+20% in adoption & +40% in usage** vs. a web platform.

Reliable

DeepIP leverage **better data** to delivers **reliable insights** across the entire patent workflow.

Collaborative by Design

Work effortlessly across teams and cases — with shared context, consistency, and control.
